## AMTEX FINANCIAL SUITE OFFERING

---

**Amtex Systems** provides the integration and message processing capabilities to help financial services companies achieve straight-through processing (STP). Companies need to share information real-time, which requires integration of internal applications. Industry managers continuously find sophisticated high performance products in the market and implement them as per their needs.

**Amtex Financial Suite** offers a robust array of intelligent business format adapters, which help in dissociating the complexity from STP and T+1.

**FIX**

**SWIFT**

**GSTPA**

**OMGEO**

**MDDL**

These enable financial services organizations to consolidate order flow from clients, increasing efficiency while keeping investments in additional systems minimal.

### **Benefits:**

Faster transaction processing

Automate trade routing

Integrates with any order management system to automate the processing of trades from order to settlement

Better electronic trading

Increased trading volume while minimizing processing costs

Facilitates Straight Through Processing

The Suite also offers health care and insurance format adapters.

HIPAA

HI7

**Amtex Financial Suite** sets to derive the architecture from Open Adapter Concept. Clients can customize the products easily with an array of tools as per their specific environments.
